RELIEF!™

COSMETIC FORMULA

WITH SIBERIAN SEA BUCKTHORN BERRY OIL

What It Is

RELIEF!™ is a treatment for certain changes to your facial appearance such as under eye wrinkles, crows' feet or pregnancy mask and for the reduction or healing of old scars.

RELIEF!™ is a simple formula consisting of (a) Siberian Sea Buckthorn Berry (SBB) Oil and (b) government certified food grade detonation synthesis nanodiamonds (DSND). The nanodiamond crystals are 30-50 nanometers (nm) in size which is smaller than some molecules.

SBB oil is used as both a “carrier” for the DSND and an active ingredient. SBB oil has a unique fatty acid profile and is the only known plant to contain all four (4) essential fatty acids (omegas 3, 4, 6, and 7). In Eastern Europe and Asia it has long been known to promote healthy skin and used to treat a wide variety of conditions.

The combination of SBB oil and DSND is powerful and improves the results that can be obtained by either ingredient by itself. The DSND crystals have a very large total surface area which is approximately 350 square meters per gram of nanodiamond. The surface is both adsorptive and “active”. Adsorptive means that it captures SBB oil on its surface and carries it to the affected area. Active means the DSND crystals carry an electric charge. Keep this in mind as you read on.

How it Works

The size of DSND crystals is so small that they quickly penetrate the pores of your skin carrying the SBB oil with it. By applying this RELIEF!™ product to your skin, the DSND crystals (carrying the SBB oil) quickly spreads over and through the epidermis where your problem is located.

The active surface of the DSND does the work in two ways:

- Its electrical activity interferes with the natural pain impulses carried by your nervous system to reduce or stop pain or itching
- Its electrical activity “amplifies” the effect of the electricity that our body normally generates to direct healing to an area

There are no systemic effects. The DSND is cleared from your body by macrophages, a natural process. There are no known side effects. The SBB oil is edible and is consumed to treat things like gastric conditions. There are no known side effects. As with anything else, **KEEP OUT OF REACH OF CHILDREN! FLUSH EYES WITH WATER IF YOU GET RELIEF!™ COMES IN CONTACT WITH THEM. DO NOT USE IF YOU ARE ALLERGIC TO SIBERIAN SEA BUCKTHORN BERRY OIL.**

Where to Use It

We have been continually surprised at the range of applications for this RELIEF!™. It has already been used for:

- Under eye wrinkles
- Crows' feet
- Facial wrinkles
- Facial discoloration such as pregnancy mask
- Old scars

USE IT ON ALMOST ANY SKIN DISTURBANCE! (Confession: it won't work on everything! We would like to know if you find something new.)

How to Use It

Although intolerance to SBB oil has not been reported, you can test yourself by applying a small amount to an unaffected area of skin and wait twenty (20) minutes to see if it gets red or itches.

Shake the bottle vigorously for 20-30 seconds to keep the DSND in suspension in the SBB oil.

Remove the cap and use the roller tip to dab a **very tiny amount** near the center of the area you want to treat. Spread it with your finger tip. This is usually more than enough to treat most conditions. Apply RELIEF!™ to the entire area twice daily, usually morning and night.

REMEMBER: when using our treatment, **LESS IS MORE!** Using an excessive amount reduces its effectiveness.

For many people, pain or itching may vanish quickly or gradually subside. Use RELIEF™ daily until the targeted area has completely healed. **Completely healed means that there is no longer a trace of the original problem or a scar and swelling and pain have fully abated.** Some types of damage may take longer to heal. This is especially true for conditions you have had for a long time or conditions that affect a larger area. **SOME CONDITIONS CAN TAKE WEEKS OR MONTHS BEFORE THEY GO AWAY.** Don't be impatient! The good news is there are no known systemic effects or side effects so you aren't exposed to the kind of issues you face when taking prescription drugs or NSAIDs.

Document outward evidence of your problem by taking a photograph so you can see your progress. We would love to receive a copy to share with others on our website!
